Detailed Action

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/15/06 has been entered.

The dismissal (on 11/14/05) of a Petition to Revive the abandoned parent application 10/456,423 is acknowledged. Since no subsequent Petition has been submitted to the Office of Petitions at the time of this Office Action, the chain of continuity between the '423 application and this instant application remains broken and applicants are not entitled to benefit of the 10/456,423 application or the 60/385,864 provisional application.

It is noted that the examiner called applicants' representative to request approval for an examiner's amendment which would place the application in condition for allowance; however, agreement was not reached in time to preclude this Office Action.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 11 is vague in that there is no antecedent basis for the phrase "the transcription product having at least one Adenoviral helper function" in Claim 1.

Claim 17 is vague in that there is no antecedent basis for the term "the third nucleotide sequence encoding a transcription product having at least one Adenoviral helper function" in the claims from which claim 17 depends.

Claims 11 and 17 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 11 and 17 are ultimately dependent upon claim 1. Claim 1 was amended to recite that the transcription product having an adenoviral helper function is the adenoviral VA sequence. Claims 11 and 17 recite that the transcription product having an adenoviral helper function is selected from various adenoviral proteins or encodes "at least one" adenoviral helper function, which is broader in scope than the subject matter of the claims from which these claims depend. In neither case do the claims further limit the subject matter of the claims from which they depend.

Claims 1-10, 12-16, 18-36 are allowed.

Art Unit: 1636

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
